PRODUCT INFO SHEET

THE WORLD'S ONLY SECURE, ONLINE CONTENT CREATION SOLUTION

COLLABORATION & SHARING

Axis World Graphics allows you to create, collaborate on and distribute highly engaging content to multiple output screens such as broadcast, the web and mobile.

Axis World Graphics is fully integrated into ChyronHego's BlueNet workflow, ensuring the highest production value in the shortest time giving users a highly efficient workflow that encompasses graphics creation through distribution and playout to air. Extending beyond broadcast, Axis World Graphics supports the creation of animations and stills in Web-friendly resolutions and formats, extending your graphic's reach to additional audiences.
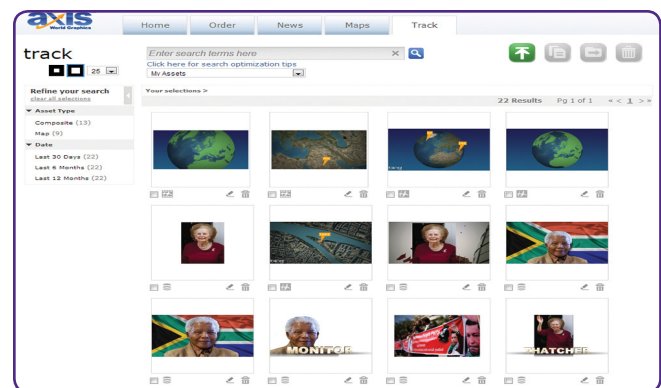

DISTRIBUTED CENTRALIZATION

Axis World Graphics is a Distributed Centralization solution. In traditional centralization models, the number of graphics required is not usually reduced.

Other solutions just relocate that work to a central hub. Axis World Graphics distributes the graphics workload to staff members at each station, leaving the graphics hub to concentrate on specialized graphics. The net result is that your graphics hub is much more efficient while the number of people building graphics at each station actually increases.

CREATE OR ORDER...YOU CHOOSE

Axis World Graphics offers two ways to fulfill graphics: create them yourself using our simple-to-use web interface, or order a custom graphic using order, our Order Management Service. order is a powerful Axis World Graphics module that allows users to request complicated or custom graphics from your hub artists. Once that graphic or animation is created, it is then added to Axis World Graphics for use and reuse in your productions – anywhere and at any time.
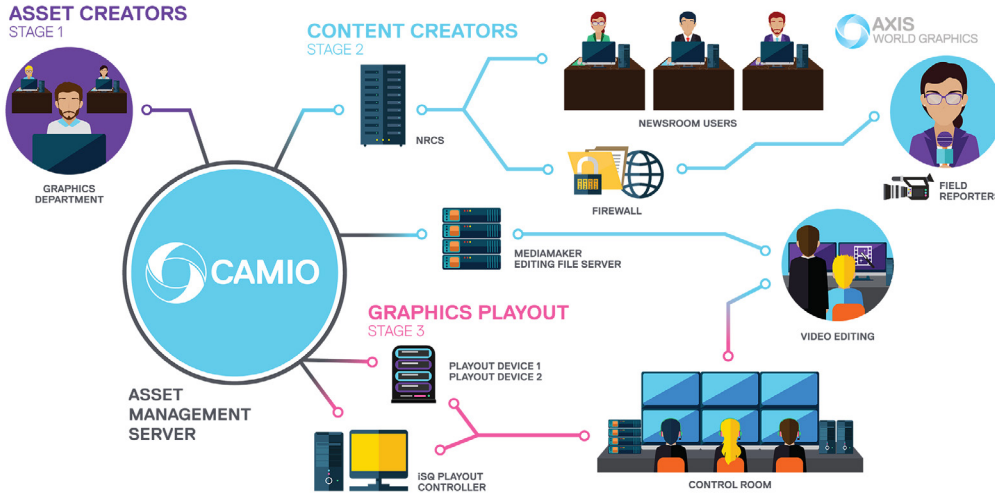

WE'RE ON THE RIGHT TRACK

track, our asset management tool, gives users the ability to share and repurpose animations such as maps and charts in the same manner that news graphics are shared, plus, we've added cloud-based nonlinear editing support to Tracker for users who edit video with our Cloud Partner FORscene. Just search for a FORscene project in tracker, select it, and it will open the project in FORscene's cloudbased video editor.

BUSINESS INTELLEGENCE

Axis World Graphics Statistical Reporting allows you to analyze how Axis World Graphics is being used in your organization. Analyze daily usage trends and determine the number of times a graphic is shared amongst your stations. Axis World Graphics Statistical Reporting provides the business answers that enable your enterprise to maximize the use of your resources and can help quantify your Return on Investment.

KEY
FEATURES

Integration with Existing Workflows

• Graphic assets created or ordered from Axis World Graphics will seamlessly flow to your playout device

Hosted Solution
